

BOLT™

The Keurig revolution just got bigger - a perfect pot of coffee, made simpler and brewed even faster.

Are you frustrated with your conventional pot coffee maker? The messy grounds, burnt coffee, and waiting for a fresh pot to brew? US Coffee has a solution: the Keurig Bolt Carafe Brewing System, a commercial grade system that delivers faster brew speed than the market-leading 120V pot coffee maker and features high quality, consumer-recognized coffee brands. The Keurig Bolt System will transform the way you think about brewing a pot of coffee whether it be in the workplace, hotel or cafeteria setting.

- *Convenient and easy to use*
- *Operationally efficient with no mess or cleanup*
- *Fresh gourmet coffee made consistently every time*

Simply place the Bolt pack into the brewer, press the Brew button and enjoy a 64 oz. pot of coffee in about 2 minutes.

BOLT

THE KEURIG BOLT SYSTEM ADVANTAGE

Leading Drip Coffee Maker Competitor

Faster On-Demand Brewing Speed

The Bolt brewer can deliver 64 oz. of delicious coffee in about two minutes vs. four minutes or more for a leading pot (120V) coffee maker.

Consistent Quality and Taste

The sealed Bolt packs keep coffee grounds fresh. Since the coffee is pre-measured, your freshly brewed coffee will always have the excellent, consistent taste that the Keurig brand is known for.

Breater Convenience, Better Operating Efficiency

The Keurig Bolt system uses convenient bolt packs. With the ideal brewing environment inside, these packs require no pre-measuring and have no messy filters or spilled grounds to clean up. The dynamic color touch screen is programmable and make it simple to brew a pot of coffee as well as dispense hot water.

Commercial Grade and Food Service Ready

This is a rugged brewer, UL-approved for commercial use only. It has an NSF-4 rating from the National Sanitation Foundation, meaning it is well suited for food service environments.

BOLT™

THE KEURIG BOLT THERMAL CARAFE

The Bolt Thermal Carafe

The innovative engineers at Keurig have crafted a custom Thermal Carafe, specially designed for use with the Keurig Bolt brewer.

Secure Operation

The Bolt brewer contains a sensor system that determines when the Thermal Carafe is securely in place, the flip lid is open, and it is safe for brewing to begin. If the Thermal Carafe is removed or incorrectly inserted, the brewing process will stop immediately.

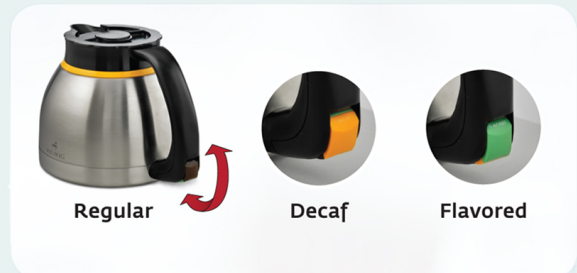

Thermal Performance

To maintain the ideal combination of taste, freshness, and temperature, Keurig recommends holding coffee within the Thermal Carafe for up to one hour. The optimal temperature range for coffee taste and freshness is 175 - 185 Degrees Farenheit. When starting at room teperature, the Thermal Carafe will maintain this temperature range for up to one hour. When pre-heated, the Thermal Carafe will maintain this range for up to two hours.

Coffee Variety Identifier

A variety identifier has been built into the handle of the Thermal Carafe so that you can specify which type of coffee it contains.

BOLT

KEURIG BOLT PACKS

How the Bolt Pack Works

What would a Keurig system be without an ingenious method of housing the coffee? The Bolt system features Keurig Bolt packs that have no messy filters to deal with and no spilled grounds to clean up. Simply place the Bolt pack in the brewer, press the Brew button, and a fresh 64 oz. pot of coffee will be ready for you in about two minutes. Since the sealed Bolt packs keep the coffee grounds fresh, you'll enjoy consistently excellent coffee time after time.

Recycling Bolt Pack Cups

Recycle your Bolt pack's plastic cup wherever #5 plastic is accepted. Visit www.boltrecycling.com for more information on whether your community is able to recycle #5 plastic today. If a recycling program is not available in your area, you have the option to recycle your used plastic cups through Keurig's mail-back program.

COOL

The Bolt packs are hot after brewing. Please allow time for them to cool.

PEEL

Carefully peel back tab to separate foil lid and filter from cup.

RECYCLE

Recycle your Bolt packs wherever #5 plastics are accepted.
